| 72/ 73 | 14 | | | 23.2 mm |

TIPS & TRICKS

- Measure your ring size at the end of the day when fingers are at their largest or measure at different times of the day.
- Consider the width of the band, a particularly thick band will feel tighter than a thin band, therefore choose a band with a similar width as the desired ring you would like to purchase.
- Do not measure your hands when they are cold or wet, as they will be at their smallest
- Alcohol and salt can make your fingers swell so refrain from measuring your ring size after cocktails and appetizers.

Ring Sizing Chart

Do you have an existing ring to measure?

No - Measure finger

1. Wrap a strip of paper around your finger where you'd like your ring to be.
2. Make sure that the paper is pulled snug to your finger. To ensure the ring fits comfortably, we suggest measuring your knuckle as well, to find your best fit.
3. With a pen, mark the point, where the paper meets and measure the distance with a ruler (mm).
4. Choose the closest measurement to the chart below to identify your ring size.

TIPS & TRICKS

- Measure your ring size at the end of the day when fingers are at their largest.
- Consider the width of the band, a particularly thick band will feel tighter than a thin band so you may want to buy a full size larger than your normal ring size.
- Do not measure your hands when they are cold, they may have shrunk up to half a size.
- Alcohol and salt can make your fingers swell so refrain from measuring your ring size after cocktails and appetizers.
